

Guidelines for the Printout of the Transit/Security Accompanying Document (TSAD) and the Transit/Security List of Items (TSLol)

(Document TAXUD 2008-1671)

The document is accompanied by the XLS file containing the data set

1. Layout of the TSAD & TSLol

Whilst the layout of the **TSAD** is rigid, i.e. **each box** presents a **pre-defined area** (not expandable); the **boxes** of the **TSLol** have to be considered as **vertically expandable**, in order to allow the printing of all the information stored in the system. When this case occurs, **each line** following the one containing one or more boxes which have been expanded, will therefore be **accordingly shifted** down.

The TSAD form contains only header level information.

2. TSAD: Printing of the “bar code”

The readable **bar code** must be printed on the right of box 1 using the standard 'code 128', character set 'B'.

99IT9876AB88901234

3. TSAD: Printing of Data Group “Seals ID”

When more seals are used and each of them is identified with a serial number, only the **first** and the **last** numbers of the seals sequence should be printed. It is **important** to note that in this case the seals used have to be in sequence, without interruption of numbering.

4. Fonts to be used

4.1. TSAD

The following fonts (available in MS Windows environment) should be used:

Font	Size	Style
Arial Narrow	7	Normal + Bold
Line Printer	7	Normal + Bold
Letter Gothic (PCL6)	7	Normal + Bold
Impact	7	Normal
Haettenschweiler	7	Normal
Haettenschweiler	8	Normal
Haettenschweiler	9	Normal
Clarendon Condensed (PCL6)	7	Normal + Bold
Clarendon (PCL6)	8	Normal + Bold

4.2. TSLol

The Transit/Security Accompanying Document shall be supplemented by a list of items even when an export consignment consists only one item.

The **boxes** of the TSLol are **vertically expandable**.

Even if in this case nothing prevents the use of other fonts, only the fonts mentioned in the previous point should be used.

4.3. Mentioned fonts not available

If the **above** mentioned **fonts** are **not available**, other fonts should be chosen, which allow the printing of the information related to a given attribute of the message IE15 in its integral length in the corresponding box of the TSAD. The chosen fonts should also preferably contrast with the layout of the documents.
