

# Appendix C : Codelists

# Introduction

This appendix lists the available code lists in order of code list number:

- The Technical Codes for which the values given here in the DDNA for NCTS Phase 4 are definitive.
- The Business Codes (those identified in the FTSS Addendum 1/2007 and the C2007 WORKING ENQUIRY GROUP for which the definitive values are those loaded into the Common Services Reference Data and available for download to NAs. Therefore, those values are not presented or only presented for information.

Each code list is structured as follows :

Number	Number used in DDNA Appendix J Correlation tables.
Name	Name, in most cases resembling the name of the relevant attribute(s).
Format	Type of code and thus of the attributes to which the code list applies.
Technical	A flag to indicate if the codelist as a whole is a Technical Codelist.
Details	Exceptions, relevant attributes.
Code	Values.
Description	Meaning of each value.
Remarks	Exceptions or remarks concerning a particular value.
TC	Flag to denote if this code is a Technical Code.

Note that the technical codes included in Business Code Lists will be maintained by the CS/RD, since the Business Code Lists as whole are maintained by CS/RD.

Please also note that due to a technical limitation of the Adobe Acrobat Writer, some characters may not be displayed properly.

Additional codes can be defined at national level in a separate National Code List. These codes will only be used within the National and External Domains and NOT the Common Domain.

Therefore they will be under the control of the National Helpdesk and will be communicated within that NA.
